HEADQUARTERS
DEPARTMENT OF THE ARMY
WASHINGTON, D.C., 3 November 1986

Aviation Unit and Intermediate Maintenance
Repair Parts and Special Tools List
(Including Depot Maintenance
Repair Parts and Special Tools)

ENGINE, AIRCRAFT, GAS TURBINE
NSN 2840-00-923-6023 (T63-A-5A)
2840-00-179-5536 (T63-A-700)

TM55-2840-231-23P, 7 April 1983, is changed as follows:

1. Remove and insert pages as indicated below. New or changed text material is indicated by a vertical bar in the margin.

Remove pages	Insert pages
i and ii	i and ii
45 thru 48	45 thru 48
---	48.1 and 48.2
49 and 50	49 and 50
63 and 64	63 and 64
79 and 80	79 and 80
153 and 154	153 and 154
---	155/156
Cover 1/2	Cover 1/2

2. Retain this sheet in front of manual for reference purposes.

By Order of the Secretary of the Army:

JOHN A. WICKHAM, JR.
General, United States Army
Chief of Staff

Official:

R. L. DILWORTH
Brigadier General, United States Army
The Adjutant General

DISTRIBUTION:
To be distributed in accordance with DA Form 12-31, Organizational, Direct Support and General Support Maintenance Requirements for Engine, Gas Turbine, T-63-A-5A, T-63-A-700 (TM 55-2840-231-series).

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your leter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual directly to: Commander, US Army Aviation Systems Command, ATTN: AMSAV-MPSD, 4300 Goodfellow Blvd., St. Louis, MO 63120-1798. A reply will be furnished to you.

SECTION I. INTRODUCTION

1. Scope.

This manual lists and authorizes repair parts; special tools; special test, measurement, and diagnostic equipment (TMDE); and other special support equipment required for performance of Aviation Unit Maintenance (AVUM), Aviation Intermediate Maintenance (AVIM), and depot maintenance of the Engine, Aircraft, Gas Turbine T63-A-5A and T63-A-700. It authorizes the requisitioning, issue and disposition of repair parts and special tools as indicated by the Source, Maintenance and Recoverability (SMR) codes.

NOTE: For detailed information concerning AVUM/AVIM Maintenance concept, refer to Appendix B, TM 55-2840-231-23.

2. General.

This Repair Parts and Special Tools List is divided into the following sections:

a. Section II. Repair Parts List. A list of repair parts authorized by this RPSTL for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. This section is arranged by functional groups in ascending alphanumeric sequence, with the parts in each group listed in ascending figure and item number sequence. The illustrations in this section will appear immediately preceding each figure of text. Items which are not assigned SMR codes appear for informational purposes only and are not to be requisitioned. Bulk materials are listed in National Stock Number (NSN) sequence.

b. Section III. Special Tools List. A list of special tools, special TMDE, and other special support equipment authorized by this RPSTL for the performance of maintenance. This section, which is arranged in figure and item number sequence, contains Engine Tools (figure numbers are prefixed E). The illustrations will appear immediately following the text portion.

c. Section IV. National Stock Number and Part Number Index. A list, in ascending National Item Identification Number (NIIN) sequence, of all NSNs appearing in the listings, followed by a list in alphanumeric sequence of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

3. Explanation of Columns.

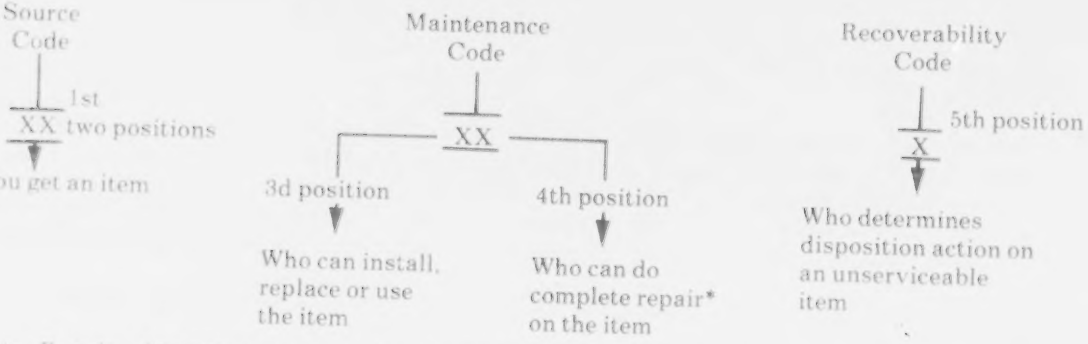
a. Illustration (Column (1)). This column is divided as follows:

(1) ((a) FIG NO.) Figure Number. Indicates the figure number illustrating an exploded view of a functional group. An alpha designator in this column indicates a specific functional group as follows:

BULK — Functional Group 60

(2) ((b) ITEM NO.) Indicates the number used to identify items called out in the illustration.

b. SMR Code (Column (2)). The Source, Maintenance, and Recoverability (SMR) code is a 5-position code containing supply/requisitioning information, maintenance category authorization criteria, and disposition instructions, as shown in the following breakout:



*Complete Repair: Maintenance capacity, capability, and authority to perform all the corrective maintenance tasks of the "Repair" function in a use/user environment in order to restore serviceability to a failed item.

(1) Source Code. The source code tells you how you get an item needed for maintenance, repair, or overhaul of an end item/equipment. Source codes are always the first two positions of the SMR code. Explanations of source codes follow:

Code	Explanation
PA, PB, PC, PD, PE, PF, PG	Stocked items; use the applicable NSN to request/requisition items with these source codes. They are authorized to the category indicated by the code entered in the 3d position of the SMR code.
KD, KF, KB	Items with these codes are not to be requested/requisitioned individually. They are part of a kit which is authorized to the maintenance category indicated in the 3d position of the SMR code. The complete kit must be requisitioned and applied.
MO — (Made at AVUM Category) MF — (Made at AVIM Category) MD — (Made at Depot)	Items with these codes are not to be requested/requisitioned individually. They must be made from bulk material which is listed in the Bulk Material group in the repair parts list in this manual. If the item is authorized to you by the 3d position code of the SMR code, but the source code indicates it is made at a higher category, order the item from the higher category of maintenance.

Code	Explanation
AO — (Assembled by AVUM Category) AF — (Assembled by AVIM Category) AD — (Assembled by Depot)	Items with these codes are not to be requested/requisitioned individually. The parts that make up the assembled item must be requisitioned or fabricated and assembled at the category of maintenance indicated by the source code. If the 3d position code of the SMR code authorizes you to replace the item, but the source code indicates the item is assembled at a higher category, order the item from the higher category of maintenance
XA —	Do not requisition an "XA"-coded item. Order its next higher assembly.
XB —	If an "XB" item is not available from salvage, order it using the FSCM and part number given.
XC —	Installation drawing, diagram, instruction sheet, field service drawing, that is identified by manufacturer's part number.
XD —	Item is not stocked. Order an "XD"-coded item through normal supply channels using the FSCM and part number given, if no NSN is available.

NOTE: Cannibalization or controlled exchange, when authorized, may be used as a source of supply for items with the above source codes, except for those source coded "XA" or those aircraft support items restricted by requirements of AR 700-42.

(2) Maintenance Code. Maintenance codes tell you the category(s) of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the SMR Code as follows:

(a) The maintenance code entered in the third position tells you the lowest maintenance category authorized to remove, replace, and use an item. The maintenance code entered in the third position will indicate authorization to one of the following categories of maintenance.

Code	Application/Explanation
O —	Aviation unit (AVUM) category can remove, replace, and use the item.
F —	Aviation intermediate (AVIM) category can remove, replace, and use the item.
L —	Specialized repair activity can remove, replace, and use the item.
D —	Depot category can remove, replace, and use the item.

(b) The maintenance code entered in the fourth position tells you whether or not the item is to be repaired and identifies the lowest maintenance category with the capability to do complete repair (i.e., perform all authorized repair functions). (NOTE: Some limited repair may be done on the item at a lower category of maintenance, if authorized by the Maintenance Allocation Chart (MAC) and SMR Codes.) This position will contain one of the following maintenance codes.

Code	Application/Explanation
O —	Aviation unit is the lowest category that can do complete repair of the item (AVUM).
F —	Aviation intermediate is the lowest category that can do complete repair of the item (AVIM).
L —	Specialized repair activity is the lowest category that can do complete repair of the item.
D —	Depot is the lowest category that can do complete repair of the item.
Z —	Nonrepairable. No repair is authorized.
B —	No repair is authorized. However, the item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are authorized for the maintenance of this item.

(3) Recoverability Code. Recoverability codes are assigned to items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the SMR Code as follows:

Recoverability Codes	Definition
Z —	Nonreparable item. When unserviceable, condemn and dispose of the item at the category of maintenance shown in 3d position of SMR code.
O —	Reparable item. When uneconomically reparable, condemn and dispose of the item at aviation unit category (AVUM).
F —	Reparable item. When uneconomically reparable, condemn and dispose of the item at aviation intermediate category (AVIM).
D —	Reparable item. When beyond lower category repair capability, return to depot. Condemnation and disposal of item not authorized below depot category.
L —	Reparable item. Condemnation and disposal not authorized below specialized repair activity.
A —	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material, or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. National Stock Number (Column (3)). Lists the National stock numberr (NSN) assigned to the item. Use the NSN for requests/requisitions.

d. FSCM (Column (4)). The Federal Supply Code for Manufacturer (FSCM) is a 5-digit numeric code which is used to identify the manufacturer, distributor, or Government agency, etc., that supplies the item.

e. Part Number (Column 5). Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications, standards, and inspection requirements to identify an item or range of items.

NOTE: When you use an NSN to requisition an item, the item you receive may have a different part number from the part ordered, but go ahead and use or furnish it as the replacement part.

f. Description (Column (6)). This column includes the following information:

(1) The Federal item name and, when required, a minimum description to identify the item.

(2) Repair parts that make up an assembled item are listed immediately following the assembled item line entry.

(3) When the part to be used differs between serial numbers of the same model, the effective serial numbers are shown as the last line of the description.

(4) The USABLE ON CODE, when applicable (see paragraph 4, Special Information)

(5) In the Special Tools List section, the basis of issue (BOI) appears as the last line(s) in the entry for each special tool, special TMDE, and other special support equipment. When density of equipments supported exceeds density spread indicated in the basis of issue, the total authorization is increased proportionately.

(6) When details of an assembly are shown on another text page, the description of that assembly is followed by a notation stating where these details can be located. "Example: 6876838, Turbine Assembly, Gas Producer. See figure 5 for Breakdown." The parts that make up the Turbine Assembly, Gas Producer will be found on the text listing for figure 5.

(7) Oversize and undersize parts, such as studs, bushings, etc., are listed immediately after the standard size part and in the same indent. The degree of oversize or undersize is stated in the description.

(8) Abbreviations (para. 6), are used to reflect the status and relationship of items similar or related items used in the end article (e.g., OBS-BY, ASSYFR, OBS-AFT-CMPL-W).

g. U/M (Column (7)). The Unit of Measure (U/M) indicates the measure (e.g., foot, gallon, pound) or count (e.g., each, dozen, gross) of a listed item. A two-character alpha code (e.g., FT, GL, LB, EA, DZ, GR) appears in this column to indicate the measure or count. If the U/M code appearing in this column differs from the Unit of Issue (U/I) code listed in the Army Master Data File (AMDF), request the lowest U/I that will satisfy your needs.

h. QTY INC IN UNIT (Column (8)). The Quantity Incorporated in Unit (QTY INC IN UNIT) indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for an assembly. A "V" appearing in this column in lieu of a quantity indicates that no specific quantity is applicable (e.g., shims, spacers).

4. SPECIAL INFORMATION.

a. The "USABLE ON CODE" title appears in the lower right corner of column (6), Description. Usable on codes are shown in the right-hand margin of the description column. Uncoded items are applicable to all models. Identification of the usable on codes used in this publication are:

Code	Used On
NC1	T63-A-5A
NC2	T63-A-700

b. Bulk materials required to manufacture items are listed in the Bulk Material Group of this manual. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in the applicable maintenance manuals.

c. Detailed assembly instructions for items source coded to be assembled from component repair parts are found in the applicable maintenance manuals. Items that make up the assembly are listed immediately following the assembled item entry.

d. In the parts list, some items are indented to show that they are a component or components of the item under which they are indented.

e. The following publications pertain to the Engine, models T63-A-5A and T63-A-700, and its components:

	Publication and Short Title
TB55-1500-307-24	Aircraft Components Requiring Maintenance Management and Historical Data
TM 55-2340-231-23	Aviation Unit and Aviation Intermediate Maintenance Manual, Engine Assembly
TM 55-1500-205-25/1	General Aircraft Maintenance Manual

f. Directional references left and right are determined by standing at the rear of the aircraft or engine and looking forward

5. **How to Locate Repair Parts**

a. When National Stock Number or Part Number is Not Known:

(1) First. Using the table of contents, determine the functional group to which the item belongs. This is necessary since figures are prepared for functional groups, and listings are divided into the same groups.

(2) Second. Find the figure covering the functional group to which the item belongs.

(3) Third. Identify the item on the illustration and note the item number of the item.

(4) Fourth. Refer to the Repair Parts List for the figure to find the line item entry for the item number noted on the illustration.

b. When National Stock Number or Part Number is Known:

(1) First. Using the Index of National Stock Numbers and Parts Numbers, find the pertinent National stock number or part number. The NSN index is in National Item Identification Number (NIIN)* sequence. The part numbers in the Part Number index are listed in ascending alphanumeric sequence. Both indexes cross-reference you to the illustration figure and item number of the item you are looking for.

*The NIIN consists of the last 9 digits of the NSN (i.e., 5305-01-674-1467).

NSN

NIIN

(2) Second. After finding the figure and item number, verify that the item is the one you're looking for, then locate the item number in the repair parts list for the figure.

6. Abbreviations.

Abbreviations	Explanation
AN	Air Force-Navy
ANPT	Aeronautical national taper pipe thread
APLTO	Applicable to
ASSYFR	Assemble from
AV	Twenty-five
AWG	American wire gage
AX	Twenty
BE	Bale
BKDN	Breakdown
BRKDWN	Breakdown into
BT	Bottle
BTU	British thermal unit(s)
BX	Box
CC	Cubic centimeter(s)
CFM	Cubic feet per minute
CFS	Cubic feet per second
CI	Cubic inch
CK	Cake
CN	Can
CNSWTH	Consolidated with
C/O	Consists of (component of)
CP	Candle power
CRES	Corrosion resistant steel
CW	Continuous wave(s)
DEG	Degree(s)
DR	Drum
EA	Each
FIG	Figure
FT	Foot
GL	Gallon
GPH	Gallons per hour
GR	Gross
HD	Hundred
IN	Inch
INTRCH	Interchangeable with
KC	Kilocycle(s)
KT	Kit
KW	Kilowatt(s)
LB	Pound
LH	Left-hand
MIN	Minimum
MS	Military standard
MWO	Modification work order
MX	Thousand
NAS	National aircraft standard
NC	American national coarse thread
NEF	American national extra fine thread
NF	American national fine thread
NHA	Next higher assembly
NS	American national special thread
O/A	Over-all
OBS-AFT-CMPL-W	Obsolete after compliance with
OBS-BY	Obsoleted by
OBSLTS	Obsolete
PC	Piece
PG	Package
PK	Pack
PORM	Plus or minus
PSI	Pounds per square inch
PT	Pint
REWKTO	Rework to
RH	Right-hand
RMKS	Remarks
RO	Roll

By Order of the Secretary of the Army:

E. C. MEYER
General, United States Army
Chief of Staff

Official:

ROBERT M. JOYCE
Major General, United States Army
The Adjutant General

DISTRIBUTION:
To be distributed in accordance with DA Form 12-31, Organizational Maintenance Requirements for OH-6 and OH-58 aircraft.

☆U.S. GOVERNMENT PRINTING OFFICE: 1989 242-451/03008

RECOMMENDED CHANGES TO EQUIPMENT TECHNICAL PUBLICATIONS

SOMETHING WRONG WITH THIS PUBLICATION?

FROM (PRINT YOUR UNIT'S COMPLETE ADDRESS)
PFC JOHN DOE
COA, 3d ENGINEER BN
FT. LEONARDWOOD, MO 63108

DATE SENT

PUBLICATION NUMBER	PUBLICATION DATE	PUBLICATION TITLE
TM 55-2840-231-23P	7 Apr 33	RPSTL for Engine, Aircraft, Gas Turbine

BE EXACT PIN-POINT WHERE IT IS: PAGE NO	PARAGRAPH	FIGURE NO	TABLE NO	IN THIS SPACE TELL WHAT IS WRONG AND WHAT SHOULD BE DONE ABOUT IT:
6	2-1 a			In line 6 of paragraph 2-1a the manual states the engine has 6 Cylenders. The engine on my set only has 4 Cylenders. Change the manual to show 4 Cylenders.
B1		4-3		Callout 16 on figure 4-3 is pointing at a bolt. In key to figure 4-3, item 16 is called a shim - Please correct one or the other.
125	line 20			I ordered a gasket, item 19 on figure B-16 by NSN 2910-00-762-3001. I got a gasket but it doesn't fit. Supply says I got what I ordered, so the NSN is wrong. Please give me a good NSN
